PARTNER ORGANISATION EVALUATION LETTER

I, Zsolt Péter Füg, the chairman of Eurotender Association, participating in the project "Soul on Canvas" under the Agreement No: 2023-3-CY02-KA152-YOU-000174378, as a partner organization, officially confirm that our institution is grateful for the opportunity to be part of this partnership and that we evaluate this project as a great success.

Through this project, we aimed to promote the importance of mental health and well-being among young people using art therapy as an innovative tool. Participating in this project allowed us to explore inclusion, diversity, and mental health topics through non-formal education methods, which contributed significantly to the participants' growth and learning. "Soul on Canvas" presented our young leaders with an opportunity to gain knowledge, practical experience, and tools regarding art therapy and its benefits for managing mental health, promoting self-expression, and boosting self-confidence among youth. The activities, such as creating beach mandalas, sand sculptures, jewelry making, photography, and poetry writing, provided a hands-on approach to encourage mindfulness, teamwork, and creativity. The facilitators of this program offered high-quality guidance and ensured that all participants were actively engaged in discussions and activities. Their expertise ensured that the project objectives—such as enhancing communication skills, fostering creativity, and promoting inclusion and diversity—were met.

After the mobility, our participants returned with valuable knowledge and inspiring experiences that they shared with our local community through dissemination activities, such as organizing workshops and creating social media content. They held both online and in-person workshops introducing art therapy methods to local youth, which allowed us to extend the impact of the project beyond the immediate participants. The final products created during the youth exchange—photographs, jewelry, and nature-inspired art pieces—were showcased in a local exhibition that raised awareness about mental health, breaking social taboos on this topic.

Sincerely,
